**Course No:** CSE-3100

**Course Title:** Web base Application Project

**Date of submission:** 20-04-22

**Submitted To:**

**Name:** Mohiuddin  
Ahmed

**Designation:** lecturer

**Department:** CSE, RUET

**Submitted By:**

**Name:** Md Al Amin Tokder

**Roll:** 1803078

**Section:** B

**Department:** CSE, RUET

**Idea no 1 :** A trustable online house booking system

**Project Name :** **TO-LET**

**Description :**

The owner of house can easily upload his house condition ,room pictures , room environment etc in his own slot .

My project works as a trustable house booking system throughout our country .

Users can select their region and search if there is any room/sublet is available in their location or their desired place .

Users can easily comment of each house and and give a rating point and review in each house .If any house is disliked by themselves the house get negative rating .Beside if they like the house environment ,room condition they will give plus point . By seeing the rating point of the room this others user can easily booked those room .

There are some trending page in my projects for each district in each division which contains the most liked room.

# WORKING PROCESS

## TO-LET

As a Tenant/  
Renter

Select Division

Select Exact location

Give rating and  
review (+/-)

Choose a desired  
house

**Transaction**  
by Bikash /Rocket/Bank

As a owner

Login  
Register

Select Division

1.Dhaka,  
2.Barishal  
3.Rajshahi  
4. ....

Select Exact location

1.House no  
2.Holding no  
3.House name  
4.Road name (indetails)  
5.Room picture  
6.Description (HousePrice)  
Uploaded by owner of  
house

**House owners  
informations:**

1.Contact no  
2.Gmail/facebook id  
3.Bikash/Rocket/Bank no

House Booked

Rating point

**Idea no 2 :** Online shopping center website

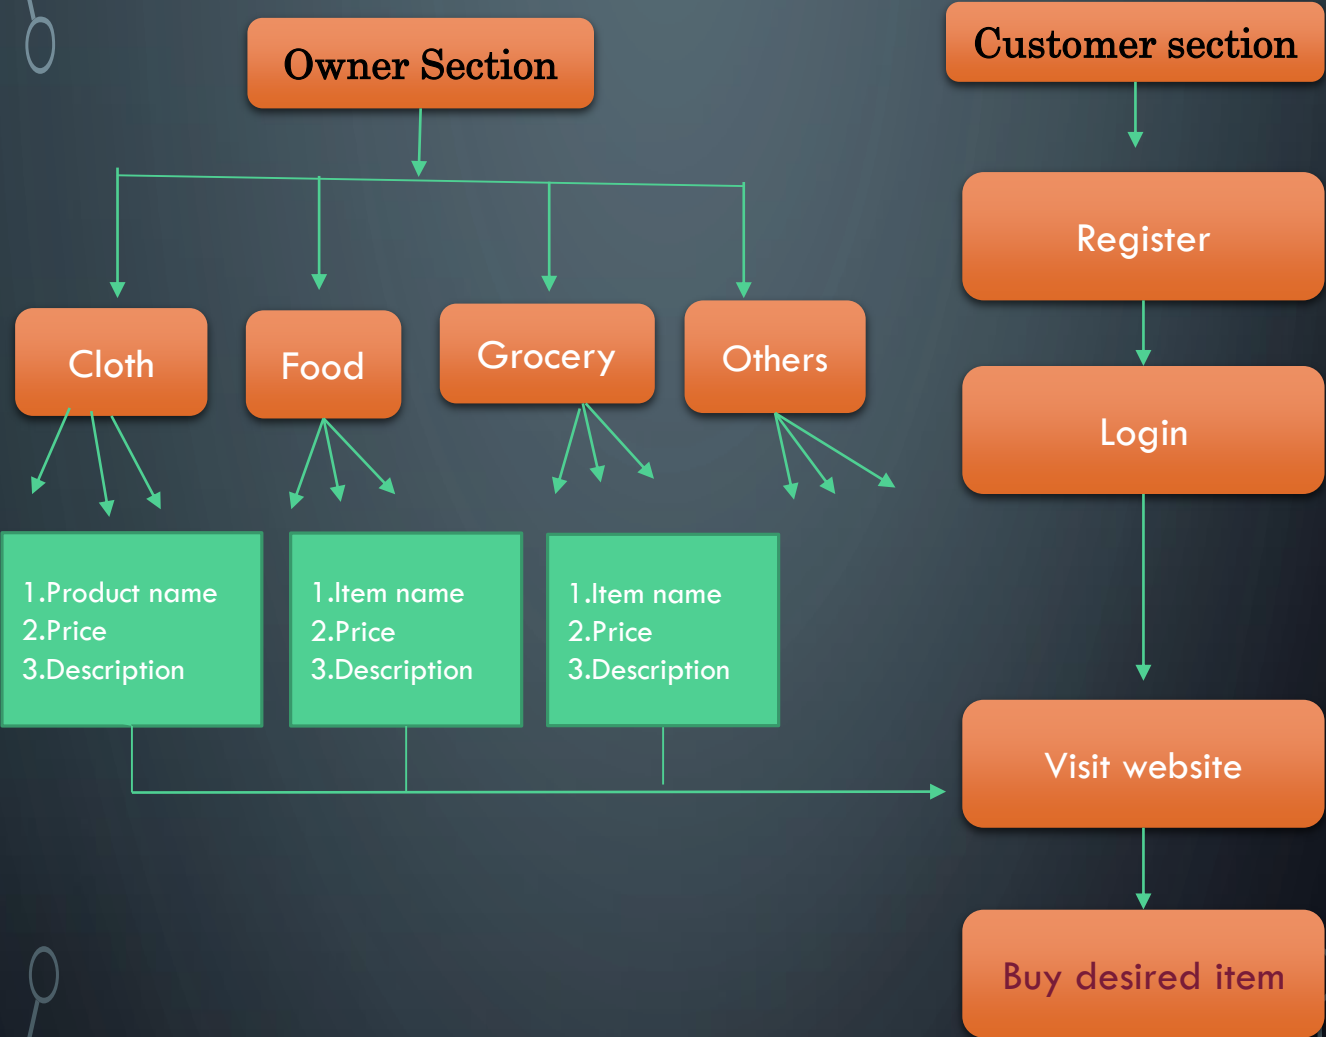

**Project Name :** **ONLINE-SHOP**

**Description :**

In this project owner of a shop can easily sell his goods or grocery item by using this website. The shop owner upload his items in different different section sothat buyers can easily search their desired item.

# WORKING PROCESS

## Online Shop

**Idea no 3 :** Anti Ragging website for RUET

**Project Name :** **STOP RAGGING**

## **Description :**

Ragging involves abuse, humiliation, or harassment of new entrants or junior students by the senior students. It often takes a malignant form wherein the newcomers may be subjected to psychological or physical torture.

In this project I want to implement my own idea through a website by which RUET authority can easily know how much rag occurred in our campus. (Authority can easily detect who is the victim and who ragged others).A rag

By taking victims and data of this website database, University administration can take necessary step to stop ragging in that site .

# Working process

**STOP  
RAGGING**

It's a crime

1.Victim section

- 1.Continue as a student(victim)
- 2.Continue as a Authority
- 3.Treding post(most dangerous ragging story)

Log in with  
Roll no

Victims info
