Idea no 1 : A trustable online house booking system

Project Name :   TO-LET

Description :

The owner of house can easily upload his house condition ,room pictures , room environment etc in his own slot .
My project works as a trustable house booking system throughout our country .
Users can select their region and search if there is any room/sublet is available in their location or their desired place .
Users can easily comment of each house and and give a rating/point in each house .If any house is disliked by themselves the house get negative rating .Beside if they like the house environment ,room condition they will give plus point . By seeing the rating point of the room this others user can easily booked those room .
There are some trending page in my projects for each district in each division which contains the most liked room.

Working process:

TO-LET

As a owner

As a Tenant/ Renter

Login Register

Select Division

Select Division

1.Dhaka,
2.Barishal
3.Rajshahi
4. ....

Select Exact location

Select Exact location

Give rating and review (+/-)

Rating point
