RAJSHAHI UNIVERSITY OF ENGINEERING AND TECHNOLOGY

Project Report

Course no: CSE-3100

Course Title: Web Based Application Project

Submitted to:
Mohiuddin Ahmed
lecturer,
Department of Computer Science and Engineering, Rajshahi University of Engineering and Technology

Submitted by:
Md Al Amin Tokder
Roll: 1803078
Section: B
Department of Computer Science and Engineering, Rajshahi University of Engineering and Technology

Project Name : " STOP RAGGING "

Theory :

Ragging involves abuse, humiliation, or harassment of new entrants or junior students by the senior students. It often takes a malignant form wherein the newcomers may be subjected to psychological or physical torture.

Objective :

In this project I want to implement my own idea through a website by which RUET authority can easily know how much rag occurred in our campus. (Authority can easily detect who is the victim and who ragged others).

By taking victims data from this website database, University administration can take necessary action to stop ragging.
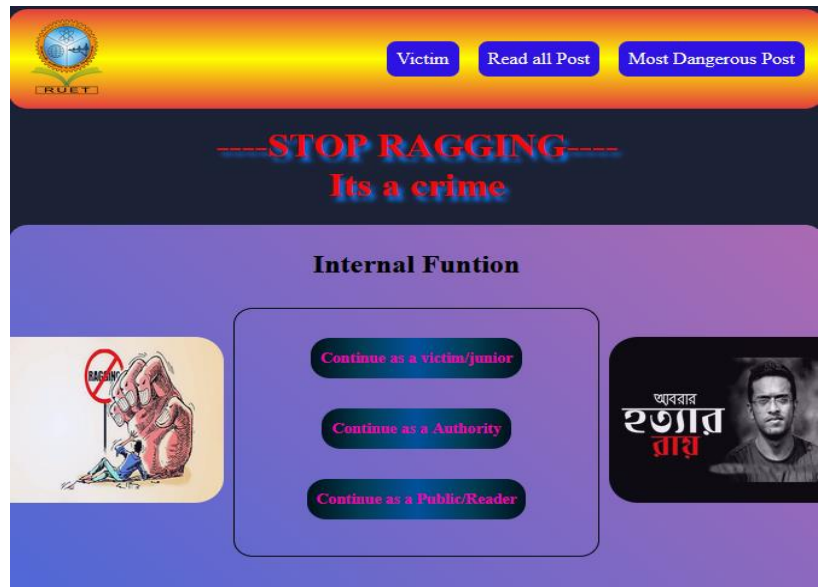

Language : HTML,CSS,PHP

Database : MYSQL

Features :

Home page :

This is homepage. It contains three part . Victim,authority and public section.

1.Victim Section:

In this section victim can describe the whole occurance briefly.He/she can included all information (Name,roll,dept,occurance place,date,time,description etc..)

Here victim can describe the whole incidence then click to submit button .Then It will save into the database.Website hide victims information.
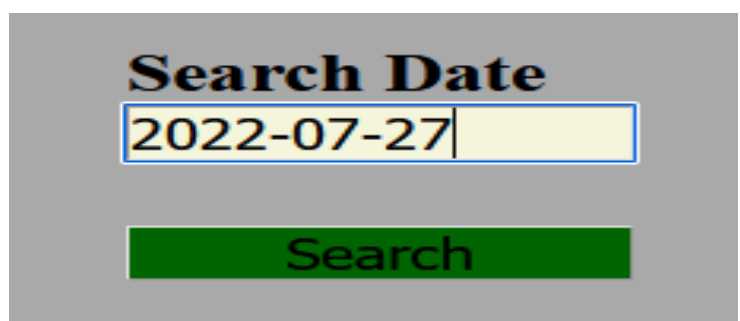

Description:

Submit

Your all data will be hidden

2. Authority Section :

In this sections RUET authority easily get the informations of victim ,occurrence place , criminals information etc from the website hidden database . Thus they can know how much and where ragging scenario occurred in RUET . Now its time to take action !!!.

RUET	With Clickatell's SMS API Platform, Give Your Customers An Experience they'll Remember. User-Friendly Web Based Interface. Competitive Text Messaging Pricing. Reliable Delivery. Easy To Implement. Global Reach and Delivery. Quick Account Setup. Reliable & Scalable.
RUET	During my teaching career at a cadet college I saw how new cadets were greeted by decorating the whole campus and entertainment for cadets and parents and principal's addressing the gathering. After three months new cadets are inducted to the old cadet through 'induction parade' that is another very gorgeous occasion. Many guests are invited on that day. All these talk about the practice of a healthy culture. But the ragging culture of recent times seems to be a new import that reflects the ferocious nature of students. Legal action against it must be taken with an iron hand. We have sadly experienced how Abrar, a meritorious student of BUET, lost his life by the torture of his fellow classmates who are also BUET students and definitely meritorious. Following this incident twenty BUET students received punishment, fifteen of them death sentence and five life

Limitations :

I am trying my best to implement all of my required features. There are some limitations in this project. In public sections Rating system, comment sections etc should be added . I will try to add this features later.

Conclusion:

This project will help our varsity to reduce any harassment situation like as ragging. Authority easily get the informations of victim, occurance place ,time ,date ,criminals information etc from the hidden database. Thus they can take necessary action.
